Profile

Experienced IT professional with a history in all different areas of information technology. Bachelors of Science in applied computing with a Diploma in Software Engineering and operation from over 5 years of working with and on computers. Developed communication, cooperation, and leadership skills from an IT support career. Knowledge of setting up a network or other system and experience in performing maintenance on a regular basis. Extensive familiarity with raw and processed numbers and analytical experience. A candidate ready to utilize 8 years of experience in IT to excel in any position

Career Objective

- To find a challenging position to meet my competencies, capabilities, skills, education, and experience.
- To progressively grow in knowledge, experience, and professionally while working in a reputable dynamic organization that offers environmental laden with opportunities in line with the speedy growth of information and Technology and Networking fields.

Employment History

System and Network administrator at Tourism Finance Corporation, Nairobi

Internship August 2020 - Date

The following duties were performed in the corporation:

- Testing software performance.
- Conducting research to gain data and information about products or processes.
- Troubleshoot issues with computer applications and systems.
- Update knowledge and the faculty about emerging trends and technology to be up-to-date.
- Monitor performance of computer networks.
- test computer hardware performance.
- Document operation activities.

Other Skills

Creativity and Self-motivation

Adaptability

Ability to Work Under Pressure

Hard Working

Time Management

Fast Learner

Problem Solving

Highly Responsible & reliable

Leadership & Teamwork

Flexibility and Adaptability

Project Management

- Analyze data to identify or resolve operational problems.
- Implement security measures for computer and information systems.
- Provide technical support for computer network issues.
- Coordinate with cloud computing backup services to prevent data loss in the institution.
- Applying software upgrades
- Providing support to all users, listening to concerns, and identifying issues to provide the needed solutions.

Education

Applied Computing, KCA University, Nairobi

May 2020 - Date

Currently persuing Bachelors Degree in Applied Computing..

Software Engineering, Zetech University, Nairobi

Jan 2019 - December 2020

Received a Diploma Certificate.

K.C.S.E Certificate, Oloitokitok Boys High School, Loitokitok

Jan 2014 - December 2017

I did my Kenya Certificate of Secondary Education.

K.C.S.E Certificate, Oloitokitok Boys High School, Loitokitok

Jan 2002- November 2014

I did my Kenya Certificate of Primary Education.

Interest and Hobies

- coddling.
- Playing Rugby.

Dear ELVIS SAUTET,

Congratulations on completing the NDG Linux Unhatched course in the Cisco Networking Academy. This letter documents you have successfully completed the NDG Linux Unhatched course, which provides an introduction to the Linux command line. Linux is everywhere! As the reach of Linux continues to grow, knowledge of Linux is a core skill for all IT professionals. By completing this course, you have gained a better understanding of Linux.

If you decide to pursue additional knowledge of Linux consider:

NDG LINUX ESSENTIALS

This course is the perfect next step for beginners looking to expand their skills and knowledge of Linux. This full-semester course can be delivered as instructor-led training or as a self-paced learning experience. The NDG Linux Essentials course is designed to prepare you for the Linux Professional Institute Linux Essentials Professional Development Certificate.

Again, congratulations and we wish you continued success!

*Sincerely,
The NDG Team*

NDG LINUX SERIES

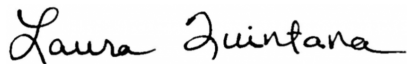

This certification level series offers beginners more rigorous in-depth coverage. The NDG Introduction to Linux I and NDG Introduction to Linux II courses focus on the basic Linux system administration skills needed in preparation for the Linux Professional Institute LPIC-1 certification.

Date 14 Dec 2020

Cybersecurity Essentials

For completing the Cisco Networking Academy® Cybersecurity Essentials course, and demonstrating the following abilities:

- Describe the tactics, techniques and procedures used by cyber criminals.
- Describe the principles of confidentiality, integrity, and availability as they relate to data states and cybersecurity countermeasures.
- Describe technologies, products and procedures used to protect confidentiality, ensure integrity and provide high availability.
- Explain how cybersecurity professionals use technologies, processes and procedures to defend all components of the network.
- Explain the purpose of laws related to cybersecurity.

Laura Quintana
VP & General Manager, Cisco Networking Academy

Introduction to Cybersecurity

For completing the Cisco Networking Academy® Introduction to Cybersecurity course, and demonstrating the ability to explain the following:

- Global implications of cyber threats
- Ways in which networks are vulnerable to attack
- Impact of cyber-attacks on industries
- Cisco's approach to threat detection and defense
- Why cybersecurity is a growing profession
- Opportunities available for pursuing network security certifications

Laura Quintana
VP & General Manager, Cisco Networking Academy

CCNAv7: Enterprise Networking, Security, and Automation

The student has successfully achieved student level credential for completing CCNAv7: Enterprise Networking, Security, and Automation course administered by the undersigned instructor. The student was able to proficiently:

- Configure single-area OSPFv2 in both point-to-point and multiaccess networks.
- Explain how to mitigate threats and enhance network security using access control lists and security best practices.
- Implement standard IPv4 ACLs to filter traffic and secure administrative access.
- Configure NAT services on the edge router to provide IPv4 address scalability.
- Explain techniques to provide address scalability and secure remote access for WANs.
- Explain how to optimize, monitor, and troubleshoot scalable network architectures.
- Explain how networking devices implement QoS.
- Implement protocols to manage the network.
- Explain how technologies such as virtualization, software defined networking, and automation affect evolving networks.

CCNA Routing and Switching: Connecting Networks

The student has successfully achieved student level credential for completing CCNA Routing and Switching: Connecting Networks course administered by the undersigned instructor. The student was able to proficiently:

- Describe different WAN technologies and their benefits.
- Configure and troubleshoot PPP.
- Configure PPPoE, GRE, and single-homed eBGP.
- Explain how to mitigate common LAN security attacks.
- Describe QoS operation.
- Describe evolving networks including cloud, virtualization, SDN, and the Internet of Things.
- Troubleshoot end-to-end connectivity in a small to medium-sized business network, using a systematic approach.

CCNA Routing and Switching: Routing and Switching Essentials

The student has successfully achieved student level credential for completing CCNA Routing and Switching: Routing and Switching Essentials course administered by the undersigned instructor. The student was able to proficiently:

- Determine how a router will forward traffic based on the contents of a routing table.
- Explain how switching operates in a small to medium-sized business network.
- Use monitoring tools and network management protocols to troubleshoot data networks.
- Configure monitoring tools available for small to medium-sized business networks.
- Configure initial settings on a network device.
- Configure Ethernet switch ports.
- Implement VLANs.
- Implement static routing and RIPv2.
- Implement DHCP on a router.
- Implement network address translation (NAT).
- Implement access control lists (ACLs) to filter traffic.

CCNA Routing and Switching: Introduction to Networks

The student has successfully achieved student level credential for completing CCNA Routing and Switching: Introduction to Networks course administered by the undersigned instructor. The student was able to proficiently:

- Explain network technologies.
- Explain how devices access local and remote network resources.
- Describe router hardware.
- Explain how switching operates in a small to medium-sized business network.
- Design an IP addressing scheme to provide network connectivity for a small to medium- sized business network.
- Configure initial settings on a network device.
- Implement basic network connectivity between devices.
- Configure monitoring tools available for small to medium-sized business networks.
